

# Instructions for installing Statistica using the license of the Faculty of Economics in Osijek

**Note:** Since the license is at Faculty of Economics in Osijek, it is allowed to use only for employees and students of the Faculty of Economics in Osijek because the website registers who has made the installation on their computer. The Faculty of Economics in Osijek can use the license only for its employees and students. Before installing Statistica, you need to remove the old version from your computer if it was previously installed.

Access the web page:

## Follow the procedure:

To access a file, it is necessary to enter your AAIE data

Select to download the file named **2020\_2021statistica\_13.5.0\_win.zip**

*Click download (located in the upper left corner) in order to download the file with all documents. It is not needed to download one by one document.*

The downloaded ZIP file must be unpacked on its local disk using 7zip or WinRar or another, and run the CDSTART.exe file in the newly created folder.

Continue the installation process - in the window where the Serial Number, Product Key, Install Code are needed, enter the data given in the downloaded file **2020\_2021statistica\_13.5.0\_win** titled **statistica13.5.0\_2020upute**

When user registration window appears, enter your first and last name, address, phone number (you can use 031 224 400), then email address on the efos.hr server. NEVER USE YOUR E-MAIL ADDRESS, which has no extension "@ efos.hr", because only the address at "@ efos.hr" can activate the license. If you do not have your e-mail address on the efos server, enter the address: stati@efos.hr.

A message will appear that you need to connect your computer to the Internet. Click OK if you are already connected to the Internet, and if you are not, connect to the Internet.

After that, continue with the installation process by clicking the "Install" button and proceed further.

In the window asking whether you want to install the Typical or Custom version, choose Custom and continue to accept everything listed.

Go to the end of the installation process and start the Statistics tool. When prompted, the "Welcome" window will appear, which closes with Close. The Statistics tool is now ready for use.
